

Full Stack Developer - Woolf University

Woolf is building the world's first global collegiate university. We are seeking a Full Stack Developer to help scale our platform that supports member colleges, professors, and students worldwide.

Responsibilities:

- Build and maintain scalable backend services in Node.js (TypeScript)
- Develop front-end interfaces using React and Next.js
- Integrate third-party APIs and manage internal GraphQL APIs
- Collaborate with product, design, and academic teams
- Ensure high accessibility, performance, and security standards

Requirements:

- 3+ years of experience in full stack development
- Proficiency in JavaScript/TypeScript, Node.js, React
- Experience with PostgreSQL, Docker, and CI/CD pipelines
- Excellent communication skills and experience in distributed teams
- Passion for education and technology
